EDUCATION

New LJ Institute of Engineering and Technology 2022–2026
B.E. in Computer Science and Engineering

Eklavya Higher Secondary School 2022
(HSC)

Aditya Birla Higher Secondary School 2020
(SSC)

INTERNSHIP

Infolabz IT Services Pvt. Ltd.
Worked on the React framework with API integration and developed an API-based React application.

IBM
Completed an internship in AI Prompt Engineering.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Java, SQL
Frameworks / Libraries: React, Bootstrap, Tailwind CSS
Developer Tools: Git, VS Code, IntelliJ IDEA, Cursor, MySQL, ChatGPT

PROJECTS

Portfolio-web | *HTML, CSS, JavaScript, React*
- Developed a responsive personal portfolio website using React.js to present projects, skills, and academic background.
- Built reusable functional components and managed UI structure for better code readability and maintainability.
- Styled the application using CSS with a mobile-first and user-friendly design approach.
- Integrated GitHub repository links and project descriptions for easy project navigation.

Music Player | *HTML, CSS, JavaScript*
- Built a browser-based music player with play, pause, next, and previous controls using JavaScript.
- Designed a responsive and user-friendly UI using HTML and CSS.

E-commerce Web Application | *HTML, CSS, JavaScript, React*
- Built a responsive e-commerce platform using React and Tailwind CSS with product listing and cart functionality.
- Implemented state management using React Hooks for real-time UI updates.
- Used LocalStorage to persist cart data and improve user experience.

TODO Application | *HTML, CSS, JavaScript, React*
- Developed a dynamic TODO application with full CRUD functionality.
- Implemented state management using React Hooks and real-time UI updates.
- Stored tasks persistently using LocalStorage for better usability.

ABOUT ME

I am a self-motivated Computer Science student with strong front-end development skills in **HTML, CSS, JavaScript, and React**. On the backend, I am currently learning **Java** and have a solid understanding of **Object-Oriented Programming (OOP)** along with good problem-solving abilities in **Data Structures and Algorithms (DSA)**.
I am proficient in **SQL** and **Database Management Systems (DBMS)** and passionate about writing **clean, efficient, and well-structured code**. I have practice multiple front-end projects, including **Myntra clone, Spotify clone, To-Do app, Calculator, Email ID Validator**, and many more.
I also have strong **prompting skills** and actively use AI tools like **ChatGPT, Gemini, GitHub Copilot, and Cursor Editor** to enhance code quality, improve efficiency, and speed up development.
Eager to contribute to real-world projects and grow as a **full-stack developer**, I am always ready to explore new technologies and improve my skills.
