- Built a responsive e-commerce platform using React and Tailwind CSS with product listing and cart functionality.
- Implemented state management using React Hooks for real-time UI updates.
- Used LocalStorage to persist cart data and improve user experience.

Task-web | *HTML, CSS, JavaScript, React*   [GitHub-Repo](#)
- Developed a dynamic TODO application with full CRUD functionality.
- Implemented state management using React Hooks and real-time UI updates.
- Stored tasks persistently using LocalStorage for better usability.

INTERNSHIP

Infolabz IT Services Pvt. Ltd.
Worked on the React framework with API integration and developed an API-based React application.
IBM
Completed an internship in mastering the art of Prompting.

ABOUT ME

I am a self-motivated Computer Science student with strong front-end development skills in **React**. And also having good knowledge of **Redux**. By practising multiple front-end projects, including **Myntra clone, Spotify clone, To-Do app, Calculator, Email ID Validator**,and many more. And created my personal portfolio which i have deployed via **Netlify**.And For backend, I have learn **Node.js** and have a solid understanding of **(OOP)** along with good problem-solving abilities in **Data Structures)**.
I am proficient in **SQL** or **(DBMS)** and passionate about writing **clean, efficient, and well-structured code**.
And well Experience to Built and deploy multiple projects via **Netlify**
I also have strong **prompting skills** and actively use AI tools like **ChatGPT, Gemini, Copilot, and Cursor Editor** to enhance code quality, improve efficiency, and speed up development.
And i want to grow as a **full-stack developer**, I am always ready to explore new technologies and improve my skills.

EDUCATION

New LJ Institute of Engineering and Technology   2022–2026
B.E - Computer Science and Engineering
Eklavya Higher Secondary School   2022
(HSC)
Aditya Birla Higher Secondary School   2020
(SSC)
